

The MOSIS Pre-Code submission deadline is being extended to Wednesday, January 18, 2006.

You must have a CERTIFIED trial to participate in pre-coding. All certified trials from the pre-code application will be submitted to CTB/McGraw Hill for pre-populated student barcode labels. You may certify your file with warnings, but all errors must be resolved (both warnings and errors are classified as violations).

We believe this system of pre-coding will decrease the burden on districts, increase the quality of the data and facilitate timely and accurate MAP data reporting. Districts will not be able to participate in the pre-code service if a MOSIS ID has not been obtained for each student. If your district has not submitted a MOSIS file, please do so immediately.

If you were unable to attend the MOSIS Pre-Code workshops, there is information available on the website that will assist you in submitting the file. The Pre-Code File Layout is available at [http://dese.mo.gov/MOSIS/PreCode\\_File\\_Specifications\\_V1\\_0.doc](http://dese.mo.gov/MOSIS/PreCode_File_Specifications_V1_0.doc). Additionally, the workshop presentation is available at <http://dese.mo.gov/MOSIS/Pre%20Code%20Workshops2.ppt>.

If you have questions regarding your pre-code submission, please contact the Data Analysis and Reporting Section at 573-751-6849.
